

Joint Information Sharing Project- Education s Health

October 2025

Background-Recent Learning

Child with severe constipation that suffered life threatening bowel perforation (lack of understanding of management plan and effect on child)

Home Educated Child (died of complications of anorexia nervosa)

Persistent highlighting of emotional issues that would be better managed if joint approach between schools and health.

Safeguarding information is not always shared by agencies with schools or with primary care. There can be assumptions that information is known when it hasn't been shared

Schools could consider sharing information in the following scenarios

School has made a referral to social care (GP is not always informed of this if the referral is not accepted and the GP may have information that might strengthen the referral)

Child is on a Safeguarding Plan and information needs to be shared before the next Review Conference

Child is on a Child In Need Plan (GPs are not always made aware of this).

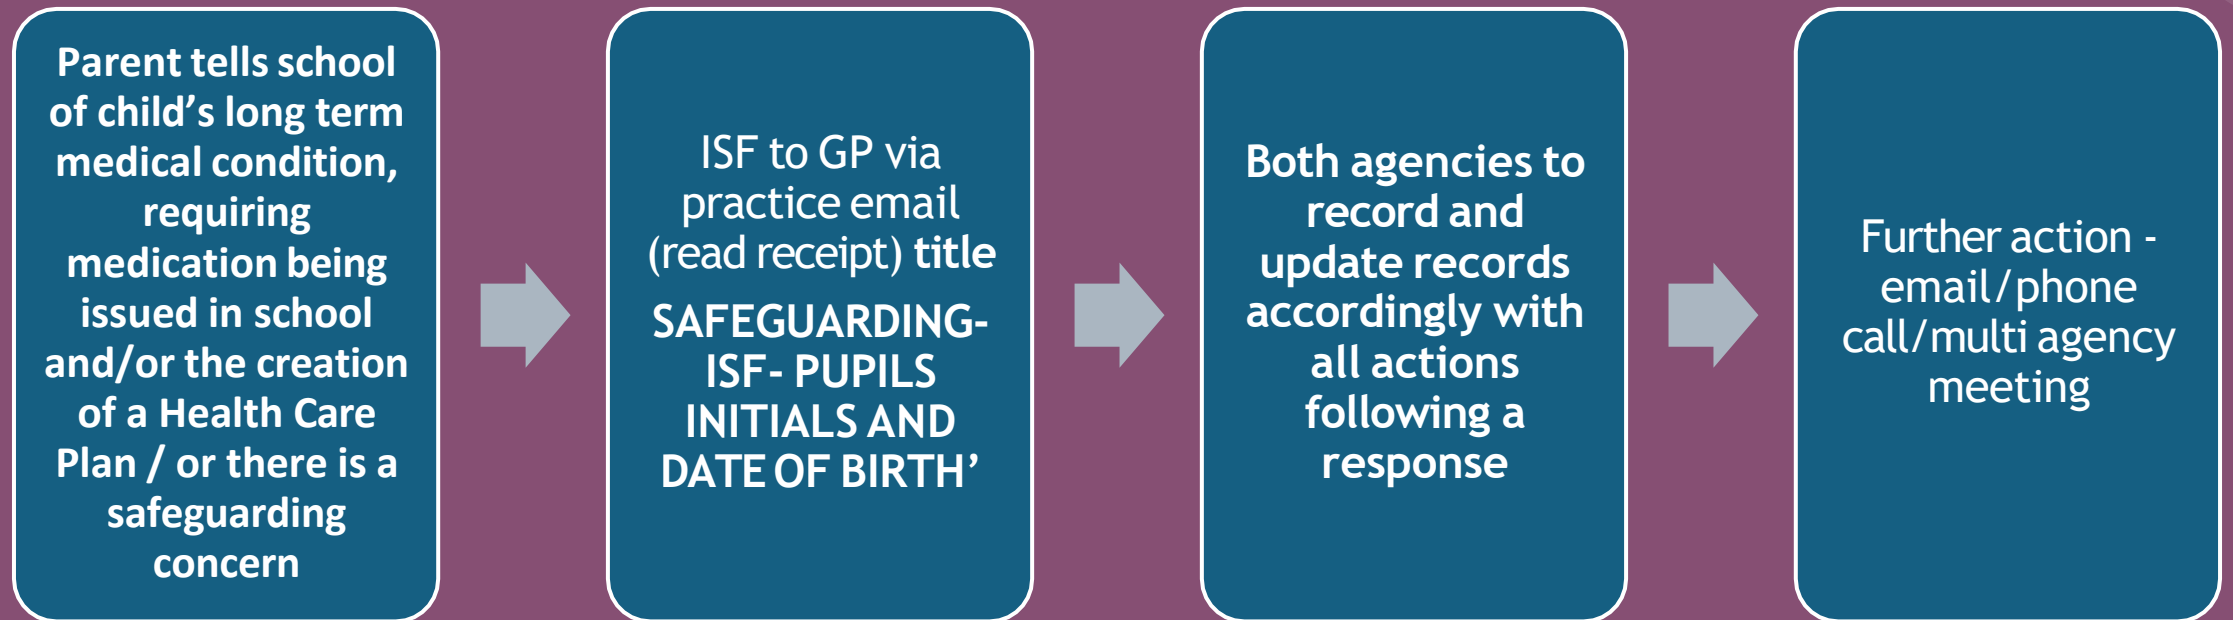

Child at low level risk of exploitation but not yet met threshold for other agency input.

Child has emerging needs and are receiving support beyond universal support in school (i.e. additional pastoral support, early help assessment underway etc)

Child becomes home educated and there are existing safeguarding concerns (currently GP is informed via the 0-1G service, and this is not always timely)

Child has existing significant health issues that school need to provide additional information and/or check needs.

Pathway and flowchart - school to health

Consider

Consent - Usually required ; can inform if safeguarding concern. Recorded.

Routine - Routine ISF response expected within 4 weeks

If urgent - contact practice and ask to speak to safeguarding lead GP or deputy and still send in ISF marked - urgent

If hospital team are involved (e.g. Epilepsy,. Diabetes) contact the specialist nurse team directly

Key Points

Schools-ensure you use the correct secure email address for the GP practice and include the subject header "SAFEGUARDING ISF-Pupil name and DOB

Primary care—ensure you have processes to send information to correct Admin support and /or GP for actioning. Consider recording information in the Enquiries tab on F12

This is a new process—there will be problems-please keep track of these and feedback to Claire.Maclean@nottinghamcity.gov.uk
